

*Take only the best!*

Al permitir practicar diversas actividades deportivas tales como el fútbol, el baloncesto, el balonmano, el tenis o el bádminton, las pistas polideportivas se desarrollan cada vez más en nuestros espacios públicos.

En colaboración con los profesionales del sector, Ecoplas ha puesto a punto 3 sistemas que responden a las distintas expectativas de las colectividades y accesibles a todos los presupuestos.

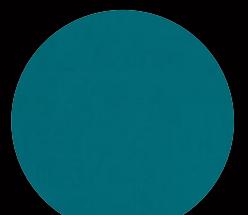

Los sistemas Ecoplas ALL STARS se adaptan tanto a los gimnasios, a las salas polivalentes, como a las pistas polideportivas al aire libre.

Allowing the practice of various sporting activities like football, basketball, handball, tennis or badminton, etc.,

We are seeing more and more multisport centres developing within our public areas. In partnership with professionals from the sector, Ecoplas has finalised 3 systems meeting the communities different expectations and accessible to all budgets.

The Ecoplas ALL STARS systems are adapted to gyms, community centres and outdoor multisport centres equally.

## ALL STARS *Success*

Recubrimiento nuevo tipo asfáltico

5 MASTERS 1000 Finish

4 MASTERS 1000 Base Coat

3 MASTERS Black Base

2 MASTERS Cushion

1 MASTERS Primer

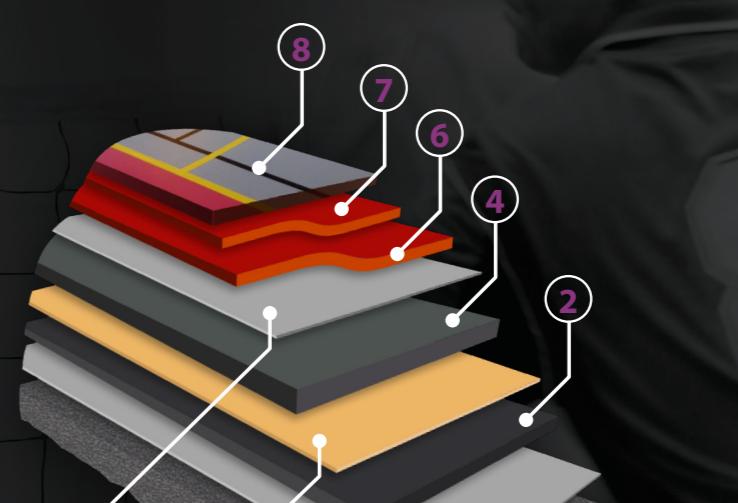

ALL STARS SUCCESS allows the practice of sport in the best conditions whatever the season. It can take a high playing volume since you can play there 24 hours a day without it becoming damaged. This coating has been designed for basketball, handball, volleyball, tennis courts etc. Laid in situ, this system consists of black rubber EPDM granules of sizes : 0.8 mm mixed in a particularly elastic acrylic resin. It is applied in multi-layers depending on the desired degree of impact absorption owing to its mechanical force and the elastic properties of the thickness of the rubber layers. The ALL STARS SUCCESS coating provides additional comfort particularly in reducing shock waves and the risk of muscular and articular accidents. With no seal or join, this coating has a low-sensitivity to temperature variations and ageing.

**Revestimientos polideportivos**  
Nuestro revestimiento ALL STARS TOP 10 ha sido diseñado para las condiciones deportivas más exigentes. Gracias a su alfombra de caucho alveolar que aporta comodidad y flexibilidad, está recomendado para todo tipo de deportes practicados en canchas o en pistas exteriores: gimnasios, polideportivos, pistas de baloncesto, balonmano, voleibol y tenis...

Teniendo en cuenta su fuerza mecánica y sus propiedades elásticas, este revestimiento de suelo disfruta de una perfecta planeidad, elimina las vibraciones y permite reducir el cansancio y los riesgos de lesiones para los deportistas. Todos nuestros revestimientos de suelos deportivos se instalan sobre soportes limpios tales como hormigones o recubrimientos... Su instalación se hace sin soldaduras y las juntas casi invisibles garantizan la homogeneidad y la perfección de la superficie.

Our ALL STARS TOP 10 coating has been designed for the most demanding sporting conditions. Thanks to its alveolar rubber mat providing comfort and suppleness, it is recommended for all types of sports practiced indoors or on outdoor grounds: gymnasiums, multi-sports halls, Basketball, Handball, volleyball, tennis courts ...

Thanks to its mechanical force and elastic properties, this flooring has the advantage of being perfectly flat, it eliminates vibrations and reduces fatigue and the risk of injuries to athletes. All of our sports flooring is installed on clean supports such as concrete or asphalt. It is applied without seals with joints that are practically invisible to guarantee a homogenous, perfect surface.
